exhibits that launch imaginations (tm)

High Fidelity Spacecraft Exhibits

Our Space Shuttle Flight Station exhibit, and NASA's Endeavour. We can recreate **any US manned spacecraft** to this level of realism and accuracy.

Space Shuttle Endeavour photo by NASA.

Spacecraft Simulators

Land on the moon in our Lunar Landing Simulator. Dock with the Agena in our Gemini Docking Simulator. Land the shuttle in our Space Shuttle Landing Simulator. **More on the way.**

Artifacts

Lunar Module Crewman Optical Alignment Sight (COAS)

Flown Apollo 14 Rotation Control
Flown Apollo 15 attitude indicator
Flown Gemini IX RCS Thruster
 Many more artifacts available.

Everything your visitors need to experience the history of US manned spaceflight!

Go to space1.com for more information, or e-mail John Fongheiser at jf@space1.com.

Resources

Recipe for realistic historically accurate spacecraft exhibits:

- Combine careful craftsmanship with:
 - Hundreds of spacecraft photos.
 - Thousands of actual spacecraft blueprints.
 - Modeling tools to recreate spacecraft parts.

Gemini astronaut mirror (from left to right): Gemini 8 photo, McDonnell blueprint, and computer model by Historic Space Systems.
